

This boat built in 1973, has actively cruised throughout South East Asia for the past 7 years by her current owner and she was cruised across the Pacific by the previous owner as well.

Her equipment list and upgrades make Scaramouch a very turnkey vessel for passage-making. Cruising equipment includes 406 EPIRB, 2 safety harness, SSB radio, 2 ocean kayaks, 3 air conditioners, multiple anchors, a new Suzuki 5 hp, 4 stroke outboard for 10' RIB, Westerbek 4.5 KW generator, a 5 kW Seapower Alternator Maxwell windlass, and extensive spare parts.

A Perkins 4236 68 HP engine powers this vessel easily and economically thru all conditions and is accessible from all sides in a very spacious engine room that provides ample storage for additional equipment.

This is a custom 2-46 with a hard dodger, a different layout below than the standard 2-46 and additional below-decks storage. All deck hatches are in good condition.

The sail inventory includes a large Main sail with roller furling, Jib, Stay sail and Spinnaker. The running rigging is all new.

Appropriately priced vessel according to her pedigree. As would be expected there are some cosmetic issues for a new skipper to address. However and more importantly the integrity of the vessel itself, her extensive equipment and systems list, plus some core upgrades made by the current skipper in the past few years of ownership make Scaramouch exceptionally good value today for those looking to go voyaging in a safe boat on a limited budget.
